Contains tri-calcium phosphate

ADA Accepted product

BENCO DENTAL

PRO-SYS Family of Toothpastes

Benco Dental introduces the PRO-SYS Family of Toothpastes—a trio of toothpastes to provide the necessary oral care for patients. The PRO-SYS toothpaste comes in a variety of flavors to keep even the pickiest of individuals in mind.

PRO-SYS Professional Rx Fluoride Toothpaste headlines the group, containing a 1.1% neutral sodium fluoride. The toothpaste is sodium laurel sulfate-free and is available in 5000 ppm. The PRO-SYS Professional Rx Fluoride Toothpaste contains tri-calcium phosphate and is sweetened with Xylitol, a common sweetener with antimicrobial properties.

The PRO-SYS Professional Rx Fluoride Toothpaste relieves sensitivity during brushing and is recommended for individuals ages 6 and up. The toothpaste comes in a vanilla mint flavor and is available in a 4 oz-tube.

Accompanying the Professional Rx Fluoride Toothpaste are the

mint and bubblegum flavored toothpastes. ADA Accepted, these toothpastes demonstrate high manufacturing standards, and the packaging and advertising claims are supported by scientific evidence.

The mint and bubblegum flavored toothpastes are available in .85 oz-tubes and are recommended for children ages up 2 and up. PRO-SYS toothpaste is part of an entirely new line of products from Benco Dental. Other products available in the portfolio include toothbrushes, in-office and take home whitening products, and xylitol products.
